

**For Immediate Release**

## **Chassis Plans Launches Rugged Portable Computer**

**SAN DIEGO, CA, December 4, 2015** --- Chassis Plans ([www.chassis-plans.com](http://www.chassis-plans.com)) has launched a rugged light weight portable computer, which is a purpose built customized solution used for ground based communications, weapons and radar systems testing.

This rugged light weight portable computer provides a 17" 1280x1024 LCD, NEMA class keyboard, and is configured with pre-qualified, high-quality, and long-life revision controlled components. This system is designed with high speed data recording through the use of 120GB solid state drives (SSD) disks. The system incorporates a Core i5 Intel Xeon processor and 13 slot PCI backplane.

The computer's rugged aluminum alloy construction provides improved rigidity and ruggedness and is designed to meet MIL-STD's 810 and 461. It is designed to operate in extreme temperatures and is built to withstand the harshest environments for deployed operations.

### **About Chassis Plans**

Chassis Plans is a design and manufacturer of computers, LCD displays, storage arrays that are designed and assembled in the USA for Military and Industrial applications.
