SMALL TACTICAL COMPUTER SYSTEMS

RUGGED SMALL TACTICAL COMPUTER SYSTEMS

CP Technologies STCS are small form factor modules that provide powerful Xeon processing performance optimized for virtualization applications, gigabit switching and routing capabilities and over 10 minutes of sustained battery backup time. All modules are ROHS compliant and made with high-strength 5052-H32 aircraft-grade aluminum. CP STCS are optimized for low size, weight and power (SWaP) to meet the demand of portability, reliability, and performance from any customer.

These systems accommodate flexible mounting options with brackets that can be mounted in a standalone configuration, to a bulkhead, in a half rack/case, or a standard 19" rack. In a sealed system configuration, these STCS are designed

for IP65 environments, as well as harsh environmental specs such as MIL-STD-810G, 901E, and 461G.
