

CKC

RUGGED RACKMOUNT KEYBOARD

RUGGED 1U KEYBOARD

Ideal for mobile missions, the CKC family includes high-performance 1U keyboard drawers. A high-quality, low-profile Cherry Ultraslim 5000 Series 88-key keyboard with integrated track ball or touch pad is incorporated. The drawer includes friction slides for mounting into a 19" rack. The drawer uses screw locks to secure it into the rack for transportation.

Its compact size and light weight rugged construction make it ideal for use in mobile applications such as transit case installations. The use of friction slides versus ball bearing slides allows it to be used in vehicular and mobile missions such as in the back of a moving Humvee.
