

STCS

SMALL TACTICAL COMPUTER SYSTEMS

CP North America's STCS are small form factor modules that provide powerful processing performance optimized for virtualization applications, gigabit switching with PoE and 18 minutes of sustained battery backup time at 400W. All modules are ROHS compliant and made with high-strength 5052-H32 aircraft-grade aluminum. CP STCS are optimized for low size, weight and power (SWaP) to meet the demands of portability, reliability, and performance.

These systems accommodate flexible mounting options with brackets that can be mounted in a discrete standalone configuration, to a bulkhead, in a half rack/case, or a standard 19" rack. In a sealed system configuration, these STCS are designed for IP65 environments, as well as harsh environmental specs such as MIL-STD-810 and 461.
